

ALL ASSETS, ALWAYS ... WITH EASE

ASSETSPIRE™

2020

Rapidly expanding client base and use case globally.

We now can cover entire cities or global enterprises.

DYNAMIC MONITORING

By connecting our Spire™ to other technologies and easily plugging it into other software we can enable you to follow assets in Live time . Knowing that they are always accurate and up-to-date.

2016

Cloud based subscription model developed including generic asset management, CAFM, DCIM, CMMS Solution

ANY ASSET VALIDATION

2015

New Platform and architecture developed for cloud use with API's and connectivity module

We built our Platform Spire™ to handle any asset, in any way our clients desired, removing “specialised” solutions and delivering a valid complete database our clients can really believe in and make great decisions using.

2011

Enterprise version of the Trackit application was developed to include dashboards & reports

2009

Trackit Mobile audit solution was developed

FAST ACCURATE CAPTURE

Because we wanted to save ourselves time and deliver 100% accuracy – we built our app to do that for us. Turned out our clients loved it. It is also true that others in our industry could not do this.

2008

Business founded. Only conducting data centre audits, globally

An asset management database is only as good as the data placed into it

Our competitors started with big glossy platforms and ignored how they captured the data

WE STARTED IN THE RIGHT PLACE
